

Year 3
Summer 2019

ENGLISH

As writers, we will be using our imagination to develop our knowledge of a text. We will be writing a range of genres based upon a focused text.

SCIENCE

The scientists in Year 3 will be investigating the parts of a plant, how water is carried around the plant, the pollination process and why the flower is so important.

HISTORY

As historians, we will look at how features have been changed by geographical features.

FLOW

MATHS

We will build on our fabulous maths work in the Autumn and Spring terms by looking at shape, measurement, time, fractions decimals and percentages! We will be very busy!

PE

The children will work with the Martin Gray Academy coaches each week working on developing their athletic skills and will be going swimming after half term. They will also be able to join in the lunchtime coaching sessions.

PSHE

The children will be working on being safe in the sun, being healthy in exercise, about bullying and our general well being.

ART

As artists, we will be taking photos of the things we find. We will use a range of materials to make models.

COMPUTING

We will be using interactive tools to follow the course of a river from source to sea. We will also be evaluating digital data.

DESIGN & TECHNOLOGY

We will make bridges thinking about how we can make our structure strong, firm and support the weight required. We will be using struts to add support.

GEOGRAPHY

We will be looking the physical features created by rivers and water. We will develop our use of maps and atlases to help our learning and compare geographical features in different places.

MUSIC

We will use instruments to develop or own soundtrack to rivers.

RE

What can we find out about a local community in Darlington?
