Division

Use either the mental method or the number line to decide if the number sentence is true or false. **If false, what is the answer?**

- $45 \div 5 = 9$
- $30 \div 3 = 8$
- $6 \div 2 = 4$
- $120 \div 10 = 12$
- $60 \div 10 = 6$
- $16 \div 2 = 7$
- $20 \div 5 = 5$
- $25 \div 5 = 5$
- $90 \div 10 = 9$
- $21 \div 3 = 8$
- $33 \div 3 = 11$

Division

Use either the mental method or number line to solve.

Miss Smith needs **30** apples for her class.
There are **5** apples in each bag.

How many **bags** of apples does Miss Smith need altogether?
20 bananas are shared equally between 5 monkeys. How many bananas does each monkey get?

12 fish are shared equally between 3 fish tanks. How many fish will be in each tank?

30 pencils are shared equally between 10 pots, how many pencils will be in each pot?

Division

Use either the mental method or the number line method to solve.

4a. Emma has 18 pieces of chocolate. She gives half of them to Mike.

Is Emma correct? Explain why.

5a. Use the digit cards to make 4 division calculations.

$$\square \div 2 = \square$$

6a. Dad is tidying up and he finds 16 socks.

How many pairs can he make?

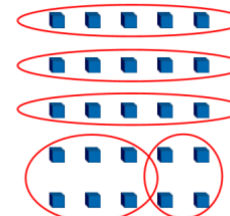

Division

Use either the mental method or the number line method to solve.

1a. 15 badges are shared equally between 5 people.

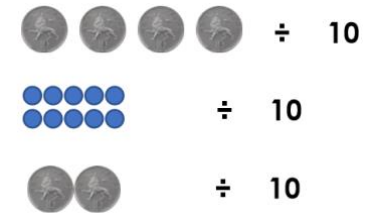

Spot and correct the mistake.

$$20 \div 5 = 5$$

Division

Use either the mental method or the number line method to solve.

5a. These are the ingredients needed to make 10 chocolate crispy buns.

Ingredients	10 buns	1 bun
chocolate	120g	
rice pops	100g	
butter	90g	
syrup	80g
