Homework Focus: To subtract fractions with the same denominator and denominators that are multiples of the same number

(Tip: Keep one of the denominators the same)

1) $\dfrac{5}{8} - \dfrac{1}{2}$

2) $\dfrac{4}{6} - \dfrac{3}{12}$

3) $\dfrac{11}{12} - \dfrac{2}{3}$

(Tip: Think about common multiples of each numbers. Could you multiple the denominators together?)

4) $\dfrac{3}{4} - \dfrac{1}{3}$

5) $\dfrac{1}{2} - \dfrac{2}{5}$

6) $\dfrac{2}{3} - \dfrac{3}{10}$

7) $\dfrac{5}{6} - \dfrac{3}{5}$

8) $\dfrac{7}{10} - \dfrac{1}{4}$

9) $1\dfrac{3}{10} - \dfrac{1}{2}$
